Bureau of Animal Industry

[9 CFR, Part 51]

PREVENTION OF TUBERCULOSIS, PARATUBERCULOSIS, AND BANG'S DISEASE OF CATTLE IN COOPERATION WITH STATES

NOTICE OF PROPOSED AMENDMENT

Notice is hereby given in accordance with section 4 (a) of the Administrative Procedure Act (5 U. S. C. 1003 (a)) that the Secretary of Agriculture is considering amending § 51.8 (b) of the regulation for the prevention of tuberculosis, paratuberculosis, and Bang's disease of cattle in cooperation with the States, (9 CFR Cum. Supp., 51.8 (b)), pursuant to sections 3 and 11 of the Act of Congress approved May 29, 1884, as amended, (21 U. S. C. 114 and 114a), section 2 of the Act of Congress approved February 2, 1903, as amended, (21 U. S. C. 111), and the item in the Department of Agriculture Appropriation Act, 1949, for eradicating tuberculosis and Bang's disease (62 Stat. 507). The proposed amendment would permit the payment of indemnity claims under such regulations to owners of cattle destroyed on account of tuberculosis, paratuberculosis, and Bang's disease when the existence of any of those diseases in the animals is determined as the result of tuberculin, Johnin, or agglutination tests applied by non-veterinarian technicians acting under the supervision of veterinarians of the Bureau of Animal Industry, cooperating regularly employed State, Territorial, county, or municipal veterinary inspectors, or accredited veterinarians, as well as when the tests are applied by such veterinarians or veterinary inspectors themselves.

Any person who wishes to submit written data, views, or arguments concerning the proposed amendment may do so by filing them with the Chief of the Bureau of Animal Industry, Agricultural Research Administration, United States Department of Agriculture, Washington 25, D. C., within 15 days after the date of publication of this notice in the FEDERAL REGISTER.

Done at Washington, D. C., this 29th day of December 1948. Witness my

hand and the seal of the United States Department of Agriculture.

[Docket No. 9165]

SUMMARY ESTIMATES OF BROADCAST STATION REVENUES AND EXPENSES

NOTICE OF PROPOSED RULE MAKING

In the matter of adoption of proposed form for obtaining summary estimates of broadcast station revenues and expenses during the preceding year; Docket No. 9165.

1. Notice is hereby given of proposed rule making in the above-entitled matter.

2. In January of each year the Commission has heretofore obtained from all broadcast stations estimates of the various kinds of broadcast revenues (i. e., network, non-network and incidental) received during the preceding year. These data, obtained in advance of the filing of Annual Financial Report Form 324, have been designed to provide the Commission and the industry with a quick over-all measure of the industry's financial experience during the preceding year. No estimate of station broadcast expenses has been included. In view of the rapid upward movement of broadcast expenses during recent years, and the resulting necessity of having information on expenses for an accurate appraisal of the industry's financial experience, it is herewith proposed to request an estimate of the stations' "Total Broadcast Expenses". It is also proposed to reduce the items on revenue information to a single item, namely, "Total Broadcast Revenues". A copy of the proposed form is attached.¹

3. Any interested person who is of the opinion that the proposed form should or should not be adopted, or should not be adopted in the form set forth, may file with the Commission on or before January 17, 1949 a written statement or brief setting forth his comments. The Commission will consider these written comments and if comments are submitted which appear to warrant the Commission's holding an oral argument, notice of time and place of such oral argument will be given.

4. An original and 14 copies of all statements, briefs or comments filed shall be furnished the Commission.

5. This notice is issued pursuant to the provisions of section 303 (r) and 308 (b) of the Communications Act of 1934, as amended.

Adopted: December 22, 1948.

Released: December 23, 1948.

HIGH POWER VHF RADIO STATIONS

APPLICATIONS IN CERTAIN ESTABLISHED AND
PROPOSED INDUSTRIAL SERVICES

DECEMBER 23, 1948.

The Federal Communications Commission announces that on December 15, 1948, it granted, on an experimental basis, the application of West Production Company, Houston, Texas, for extension of authority to operate its high powered (5000 watts maximum plate input power to the final radio stage) Class 2 (Petroleum) Experimental radio station K5XCY for a period of six months.

This grant was made for the purpose of obtaining information regarding the desirability of the use of high power versus medium power for radio stations in the existing utility radio service and in certain proposed new services. This information is desired in connection with a study now being made to determine power ceilings feasible for radio stations

in one or more of the following established or proposed radio services:

- (a) Geophysical service (covered by Part 11 of the rules).
- (b) Special press service (covered by Part 11).
- (c) Intermittent service (covered by Part 11).
- (d) Railroad radio service (covered by Part 16).
- (e) Utility radio service (covered by Part 17).
- (f) Experimental radio service (covered by Part 5)—when the purpose of the contemplated operation falls within the scope of any of the above services, or of new services contemplated by the proposed revision of Part 11 (Industrial radio services) or Part 16 (transportation radio services).

Although a few three kilowatt experimental stations have been authorized in these services, the purpose of such authorizations has been to obtain data relating to coverage and interference in order that the Commission may determine what rule changes, if any, should be made with respect to power ceilings in the mentioned services. The Commission considers that the limited number of stations now in operation, or authorized, will provide adequate information on this subject. Accordingly, it does not appear that authorizations for additional operations of this type on an experimental basis would be warranted pending commission determination as to whether higher power can be authorized on a permanent basis. By withholding applications for such authorizations until such determination is made, applicants would be protected from unnecessary expenditures for equipment and installations, and at the same time assist in expediting action on rules under which such operation might be authorized upon a regular basis. In view of the volume of work before the Commission, it is anticipated that it will be at least a year before final study can be completed.

Pending a final determination of the feasibility of revising the maximum transmitter power output ceiling upwards, a careful study will be made by the Commission's staff of information relating to this matter from material now on file and experimental reports hereafter submitted by the licensees presently authorized to conduct operational experimentation in this field. In the event the results of this study indicate that changes in the applicable power ceilings may be in the public interest, appropriate rule making proceedings will be instituted on the Commission's own motion. In any event, if it should be determined that operation with higher power is not in the public interest, those licensees now authorized to experiment in this field will be required to reduce power in order to re-license their present experimental equipment in a regular service.

Adopted: December 22, 1948.

Released: December 23, 1948.
